HERITAGE DESIGN TECHNOLOGY VISION RANGE

With tireless passion and unstinting commitment to creating the finest bathroom and architectural hardware fittings, Samuel Heath continues to employ time-honoured skills, combined with 21st Century technology.

With a history dating back to the early 1800's, Samuel Heath have centuries of manufacturing knowledge and expertise. Samuel Heath have embraced and invested heavily in both new and emerging technologies and is where tradition and innovation meet.

We form our products from the finest European pure solid brass using specialist skills which have been handed down over the years and we ensure that the best practice is used at every stage for performance and durability so you cherish your Samuel Heath fittings for years to come.

1 Drawings showing the design process.

2 Brass stocks in Samuel Heath factory in Birmingham.

3 Computer numerical control (CNC) machining.

4 Each Samuel Heath product is hand polished to perfection.

GOOD DESIGN ALWAYS SURVIVES

People are becoming more aware of the relationships between the built environment and their physical and psychological well being. The Xiara collection is sympathetic to the forms of nature and to the body, mind and spirit. Retaining a contemporary simplicity, the design features subtle curvilinear forms that are feminine and precise.

“ XIARA IS PURPOSEFUL
AND FULL OF INTENT;
YET FEMININE AND
ELEGANT”

Xiara is a contemporary interpretation of minimalist brassware design, each element has been pared down to give a pure, refined approach. It is both modern and stylish without compromise. Technological advancements have resulted in a collection with superior performance. Sustainable design is core to the Samuel Heath ethos and Xiara represents that commitment through its design and make up.

**“ A NEW ERA THAT
DEMANDS A HIGHER
DEGREE OF USABILITY,
HONESTY AND
ENVIRONMENTAL
CONCERN”**

The aim with Xiara was to create a brassware range with the design flexibility of Xenon whilst bringing a defined, gentle shape to the control which is most evident in the lever design.

The Xiara collection reflects the current movement towards smaller, softer fittings.

“ EXQUISITE DETAIL WITH
A SMOOTH LUSTROUS
FINISH”

XENON™

Xenon symbolizes only pure, simple form, without the distractions of what is obscure and ornate. Xenon epitomizes an ideal of longevity which transcends time; it is not a style but an approach of purpose and simplicity, only function and form at its most pure.

The functionalist application of simple geometric forms is applied with materials such as chrome, glass, wood and stone. Minimalism is a celebration of the power of human beings to create, improve and reshape their environment and through the design process using rational thought to achieve spiritual goals.

**" MEANS MUST BE
SUBSIDIARY TO ENDS
AND TO OUR DESIRE FOR
DIGNITY AND VALUE"**

LUDWIG MIES VAN DER ROHE, 1886-1969

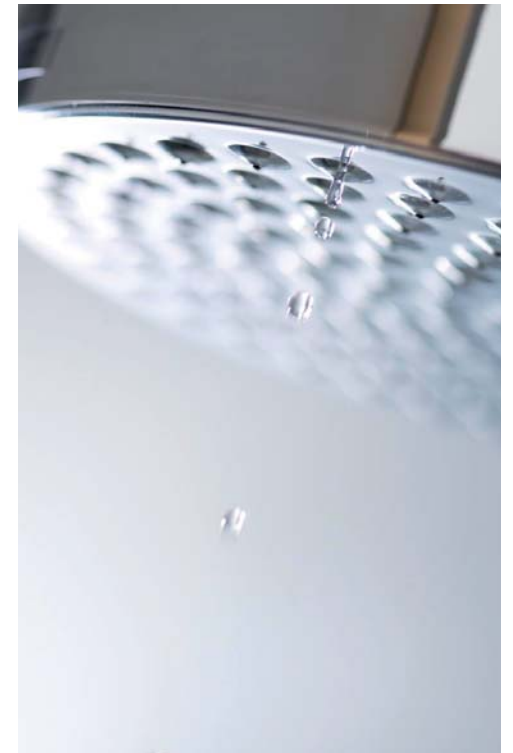

Accommodating life simply but beautifully.

Uncompromising form and function underpins the Samuel Heath Xenon collection. With enhanced flexibility it meets the most demanding requirements whilst maintaining the obdurate Xenon design.

Bold and sculptural Xenon typifies the essence of minimalism without extraneous elements. Using only a small number of like shapes for design unity a single object can become the focal point.

Minimalism as a way of life is that of simplicity. It offers simple structures, clarity, poise, and an uncomplicated philosophy, which leads to contentment.

With unerring performance and flexibility Xenon taps offer many different design executions and fulfill all interior design requirements.

Fairfield

GOOD DESIGN ALWAYS SURVIVES

Celebrating the rich character and craftsmanship that symbolises the late 19th century, the Fairfield collection embodies the diversity and eclecticism that typify this most dynamic of periods.

Fairfield draws influences from domestic architecture of the period, plaster work, balustrades, newel posts, cornices, pediments, architraves and quoins featuring classical motifs.

Fairfield is a carefully balanced combination of these formal influences from the Arts and Crafts Movement with elements of organic flowing lines that were to become a hallmark of the Art Nouveau period. Attention to detail, careful proportioning and quality of materials and manufacture make these hand finished pieces a true reflection of the qualities inspired by the era.

Fairfield is not a retrospective design; it is an evocation of the spirit of the era being very much at the forefront of today's design trends of soft curves and opulence.

Eclectic, unique and timeless have become watchwords of interior design, stylish interiors are now a combination of the old and the new. Fusing traditional aesthetics, high tech finishing and contemporary materials is a reaction against mass production and globalization offering individual expression.

Fairfield shower valve and 3 hole basin taps have been teamed with minimalist bathroom furniture and a pearlescent traditional tile design to create a classic setting which is still modern and contemporary.

Photo: Jesse Alexander

The Fairfield collection offers the opportunity to create a bespoke personalised bathroom. With a host of tap and shower controls Fairfield offers a classic design with the flexibility of a modern collection. Fairfield uses a combination of lever and cross top controls. Combine Iroko wood, the finest porcelain or handcrafted matching metal levers or cross tops in the corresponding finish.

Add a luxurious twist to the classic Fairfield collection with a stunning, cut-crystal lever design. The crystal levers are handmade and individually created by a team of craftsmen and feature intricate hand cut detail.

Embodying the current trend for opulent fittings and design Fairfield crystal levers are available in clear crystal and dramatic black for Fairfield taps and showers and promise to bring an element of glamour to any scheme.

Antique

Our traditional and authentic period brassware uses the latest technology to ensure these original period designs are compatible with today's bathroom installations.

Design elements, new technology and materials are not necessarily the enemies of sensitive traditional design. People expect contemporary fixtures in a bathroom as they would up-to-date appliances in a kitchen and the Samuel Heath Antique collection captures the essence of the period.

Featuring ornate detailing with certain grandeur these taps and showers can be styled with rich dark colours, patterning and embroidery for a faithful re-creation.

Kevin McCloud
BY
SAMUEL HEATH

Introducing the new bathroom jewellery collection designed by Kevin McCloud and made by Samuel Heath. From the outset Kevin McCloud wanted to create a feminine design and wanted the range to feel like jewellery for bathrooms - he designed the pieces to be soft and fluid as though teased into shape. With glamorous details many pieces feature small circles of mother of pearl.

skye

The Post Modernist Skye collection has qualities where organic lines sit perfectly with strongly defined angles creating a clean yet curvilinear line.

A break away from the formulaic; Skye takes inspiration from the forms of nature with certain fluidity and biomorphic origins.

Skye unites lustrous chrome with a warm white fine porcelain for a modern yet classic style. Skye offers a timeless look which can be used with contemporary or traditional schemes.

Shower accessories

If you're looking for stylish and practical bathroom storage, Samuel Heath shower accessories will look stunning in any bathroom. These bathroom essentials ensure all your potions and lotions are stored neatly.

Every single Samuel Heath shower basket is constructed by hand. Each basket 'wire' is hand positioned and crimped securely in place never soldered so your basket will remain perfect for years to come. Of course there are automated processes which can also achieve this however Samuel Heath aim to always use the best method available and in this case their expert basket assemblers ensure your basket will remain as it was the day it was made.

Profile

First impressions count. The first impression of your home is as important as the one people have when they walk through your front door. So why compromise with door and window fittings; these are items which we live with and touch everyday.

Samuel Heath offers four suites of high quality solid brass door and window fittings, each with its own distinctive style, but all sharing the same renowned heritage that has made the company one of the world's foremost exponents of architectural ironmongery.

The Profile suite offers a smooth classic feel with timeless elegance which sits well with a period or contemporary style. Profile is available in a range of finishes.

Contour

Each hardware suite as with the bathroom fittings is produced using carefully selected raw materials converted to durable, luxury fittings through the application of cutting-edge production technology and skilled hand finishing techniques, a perfect combination of modern efficiency and the care and attention to detail of the craftsman's eye.

The result is a fine selection of fittings for internal and external applications, complemented by a comprehensive range of general hardware to assure continuity throughout every project.

The precise concentric patterning of Contour creates an eye-catching and tactile style.

Cobden

Samuel Heath's Cobden range, offered in polished brass finish, will enhance any door. With unashamed traditional style, Cobden's bold design presents a unique choice for those looking to create a statement.

The Cobden suite offers a more ornate appearance, with sculptured corners. The polished brass finish is treated with an electrophoretic lacquer which provides six times more wear resistance than traditional wet spray lacquer.

Finishes

Our plated finishes go through a series of polishing processes before they have a layer of copper applied and then nickel applied to the surface. This process can involve up to 28 different stages to produce the recognised finish we require. The polished brass finish first goes through the same polishing process as plated products, and then has an electrophoretic lacquer applied. The lacquer is subsequently baked at 170°C to give a hardwearing and durable finish.

How we do it: A tap for life

Increasing concerns with environmental and social problems are the greatest cultural shift of the 21st century. Luxury does not need to cost the earth; you can choose quality and style without compromising the planet.

Sustainability is a way of life; it's not just about the carbon footprint of what you buy. It is a set of values that goes beyond green statements.

At Samuel Heath sustainability is at the heart of everything we do. Beginning with the design which demands great performance and durability; balancing this performance with water wastage and environmental concerns we work hard to reduce our impact on the environment with continual improvement in all that we do.

Samuel Heath uses only the finest quality materials which are locally sourced and uses responsible manufacturing processes which are energy efficient and accountable at every stage of the process. This includes a commitment to water and waste reduction; recycling all our waste brass for reprocessing; efficient distribution; minimizing packaging and shipping waste. And not least our products are made entirely in the UK.

Our taps and showers are designed to allow good flow even for traditional British low pressure systems however we encourage you,

as we do, to save water. By adding a small component which restricts flow (for high pressure systems for instance) we can all contribute to saving the planet's vital resource.

A Samuel Heath object is created by authentic British craftsmanship and engineering. Our products are created to stand the test of time for a lifetime of appreciation and are almost completely recyclable themselves – not that you'd get round to it.

At Samuel Heath we design solutions which meet the needs of today without compromising the ability of future generations to meet theirs...

Turn off the tap.

How we do it: Design & trends

Intuition and knowledge are vital to Samuel Heath's design process. We understand that great design is a complex amalgam of function and form and must meet the needs of all our senses.

Predicting and evaluating these interior trends is core to successful designs, which deliver both aesthetics and function, and thus enhance our lives.

The Samuel Heath design team get to the heart of these trends; researching, interrogating and analysing, taking conceptual ideas through development to produce designs which fulfil desires and are a joy to experience everyday.

How we do it: Finest materials

Samuel Heath source the world's finest brass which is the essence of each and every Samuel Heath product.

Samuel Heath brass is sourced locally less than 15 miles from our factory which is made in part from graded recycled material.

Like any recipe the result is in direct relation to the quality of the ingredients. With its intrinsic weight and durability solid brass is married together with complementary materials such as wood, crystal and bone china.

How we do it: Craftsmanship & technology

Samuel Heath employs a unique blend of traditional time honoured craftsman skills.

Whilst benefiting from this heritage of craftsmanship Samuel Heath embraces the latest technology and uses the most advanced machining technology and testing facilities available

However with over two centuries of manufacturing heritage and expertise the company often chooses to make products the old way as this is still the best.

Hand finishing

Samuel Heath still uses traditional hand finishing techniques in many of our manufacturing processes; each product is hand polished to create a flawless surface for the final plated finish, whether this is chrome or brushed stainless steel finish.

How we do it:

Integrity & perfection

Taking the right path; never a short cut is the philosophy of Samuel Heath. Integrity and provenance have been the core values of the company since 1820 and this is still true today.

Whether it is a traditional manufacturing technique or using the latest machinery; only the best method will do.

Absolute perfection is standard and quality checks at every stage of the production process ensure the highest possible quality and performance.

How & where to buy

How to get advice

The Samuel Heath showroom is at Design Centre Chelsea Harbour so you can experience first hand what makes our collection so special. Here you will be able to see a large selection of products and talk through your requirements with our experienced staff.

Samuel Heath taps, showers and accessories are available to buy through a worldwide network of bathroom retailers and showrooms who will be happy to show you our products so you can experience the designs and quality for yourself.

These showrooms can offer technical advice, bathroom design and planning to create your own personal sanctuary.

Our architectural hardware is available through a network of qualified architectural ironmongers and from selected retail showrooms.

For a local stockist please visit the where to buy section on our website where you can search for your nearest stockist. Alternatively please call our customer service team who can advise you.

Our customer service staff are available to offer you advice and assistance on choosing our products and help with technical queries.
